SOUND
RELATIONSHIPS

Dr. Sathya Ranna

Founder and Visionary : Shreya Hearing Clinic.

Dear friends,

I profusely thank you for contributing your precious time to read this brochure.

Hearing loss affects the society to a great extent. It begins in a gradual manner, and later develops into a full fledged disorder over a period of time. Unfortunately loss of hearing often is neither recognized nor treated properly.

According to the latest estimation, hearing loss affects around 8% of Indian population. Surprisingly, contrary to the general perception, among those affected by impairment, along with the elderly, other age groups are also equally affected.

In reality many people, quietly suffer with this deficiency due to lack of awareness. Undoubtedly hearing impairment creates innumerable impact on personal life. Often the impaired are victims of impairment facing embarrassing situations in their life. Impairment stalls progress in their career, and also isolates them from the family and society. In the long term these sufferings culminates into low self esteem and further leads to psychological depression.

Hence our intention through this brochure is, to eliminate few mis conceptions, and to convey a few facts about hearing impairment in the right perspective. Moreover hearing Impairment could be accurately identified and also treated with the help of advanced technology. So those who are able to identify their impairment, during the early stage, and are accurately diagnosed would be the true beneficiaries.

Again we reiterate our commitment towards this noble cause and desire to offer our quality service and support at your disposal. Hence we appeal to you to, kindly accept our gesture, provide us an opportunity to help those, unfortunate victims of hearing impairment. They may be existing as part of your organization or as your business partners.

Let us join hands to bring back music into the life of the hearing impaired.

Come..
Lets join hands
in fostering better communication

Profile of Dr. Sathya Ranna

A dream run towards service and success!

Dr. Sathya Ranna is a pioneer in the field of private Hearing Aid dispensing associated with rehabilitation services. She is an award winning entrepreneur.

Almost twelve years ago in 1998 she made a humble beginning with a solitary unit of Shreya Hearing Clinic at Indiranagar. In the years to follow due to her sustained efforts and passion towards the cause, to day she has expanded into two states with series of multi city units, fully equipped with state of art infrastructure and offering sophisticated services.

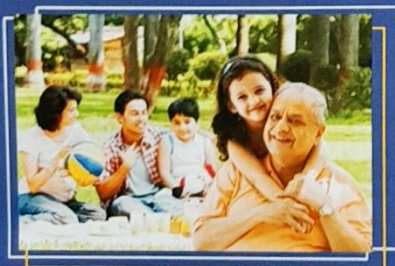

Inspired to the core towards the subject of Speech & Hearing, later she completed her graduation and master degree as a gold medalist. Simultaneously she has achieved this feat as UGC scholar under Mysore University. Further she went on to add one more feather to her cap, as she earned her doctorate from the prominent institution like All India Institute of Speech & Hearing under University of Mysore.

As a successful entrepreneur, she has been recognised by various awards. Significant among them are, Siemens Annual Excellence Award (which she is winning consistently for many years) and Best Entrepreneur award in Audiology from Indian Speech & Hearing Association.

In the scientific and intellectual world, she is known with her articles to medical Journals and through her participation in various National level conferences, where she has presented her research work.

Efforts of Dr.Sathya Ranna to create awareness about hearing loss among the general public.

Apart from the laurels in the academic and professional front, Dr. Sathya Ranna is contributing immensely towards social cause through her articles in major print media publications. She has participated in numerous prominent telemedia channels, who invited her as honorary speaker for their program organized on hearing loss, like, Etv, Vanithe, Kasthuri, Sthreeloka etc.. Above all, at many places and social gatherings she has delivered lectures on subjects like, Early Identification of hearing loss, advancement in hearing aid technology etc...
