Shreya Sound Lab:
Shreya's highly equipped sound lab will help you take the gentle step from silence to sound. Here you can actually experience the ease with which you can carry on your near and dear ones by using a hearing aid. Home office, wedding or railway station we can simulate the sound environment for you with the help of advanced multimedia facilities available at our lab.

Unique Facilities at **Shreya**

International standards in hearing aid fitting using state- of the art audiological equipment.

Fully computerised audiometry and extensive diagnostic hearing examination

Hearing Aid Analyzer to analyze the hearing aid's acoustic specifications.

Real Ear Measurements to measure the effectiveness of the hearing aid in one's ear. This helps to tune the acoustic characteristics of the hearing- aid to meet the individual's need in the most objective method.

Dear DR RANNA,

Thank you for your letter of the 1st March. I only received it today. The village postal system goes at a snail's pace. I appreciate what you and your dedicated staff are doing for me throughout these many years. What I can say is "GOD BLESS YOU ALL"

Yours Very Sincerely
Mastola
(M.L. CASTELINO)

"I really appreciate your services."

I have been to Indhanur clinic many times and this was my second visit to Kannanagala clinic. I want to express my deep appreciation for the councillor's dealing with me and the staff and professional level the discipline during my stay. It was my best experience so far at any clinic and I wish the councillor all the best.

Thanking You,
Yours Sincerely

Dear Dr. Sathya Ranna,

I have been a proud customer of Shreya hearing clinic for since 12+ years and I strongly recommend them to others. I consider Dr. Sathya Ranna and all the audiologists working there as long time friends. I always feel at home in Shreya getting personalized service, reminders to get hearing aids serviced, etc. At Shreya hearing clinic the satisfaction of the client is utmost priority and they do not stop until we are satisfied and happy with our hearing aid, service, etc. Dr. Sathya Ranna has even gone out of the way, to let me buy high end hearing aid on trial basis with an option to switch to other model, if it did not meet my requirements. It helped me to buy the hearing aid is after sales service. One of the very important factor in purchasing hearing aid is after sales service. Purchasing of hearing aid is just a beginning. Shreya hearing clinic has surpassed my expectations in service offered. For instance, once my new ear mold did not fit properly and they went on with 2-3 iterations, until I was happy with Shreya hearing their cost. They also get the hearing aids serviced at shortest period. I cannot imagine any other clinic to meet the standard of services of Shreya hearing clinic. There is one very important reason for this. Shreya hearing clinic has in place a robust back end system, like in-house ear mold manufacturing facility, continuous training of audiologists, call center to cater to needs of clients, internal courier systems, computer networked branches, to name a few. This is a major advantage, as one can visit any of their branches for hearing aid related work. For those who are buying new hearing aid and contemplating whether to go for hearing aids which support Tek, it is good to have external sound reduced or blocked, when using Tek. I strongly recommend them to opt for hearing aids with Tek for slowly adapt and improve your listening ability as you continue to use Tek for extended period. I had nice time at your place, when I visited you. I cherish the moments of conversation, and your advice.

Regards
Subhash S
Senior Engineer, Holland.
